

# Mohammad Kaif Raza Kalim Ansari

Pune, India | kaifraza.dev@gmail.com | +91 9373260538 | linkedin.com/in/kaif-data-engineer | github.com/kr492

## PROFESSIONAL SUMMARY

Data Engineer with hands-on experience in Python, SQL, machine learning, data processing, and software development, with a growing focus on Data Engineering and Data Analytics. Experienced in building Python-based automation and computer vision systems, working with databases, APIs, and real-world data. Recently completed the Databricks Fundamentals Accreditation, SQL Analytics on Databricks and currently developing practical skills in Data Engineering on Databricks, with a focus on data engineering fundamentals, data pipelines, ETL concepts, cloud-based data platforms, data preprocessing, and machine learning fundamentals.

## TECHNICAL SKILLS

**Programming:** Python, SQL, Java, JavaScript

**Data & Analytics:** Pandas, NumPy, Matplotlib, SQL Analytics, Data Processing, Data Preprocessing

**Data Engineering:** Data Engineering Fundamentals, Data Pipelines, ETL Concepts, Data Processing Workflows

**Databases:** MySQL, Database Concepts

**Machine Learning:** Machine Learning Fundamentals, Scikit-learn, Model Development Fundamentals

**Cloud & Platforms:** AWS, Databricks, Cloud Computing Fundamentals

**Frameworks & Libraries:** OpenCV, EasyOCR, ReactJS, NodeJS

**Tools:** Git, Raspberry Pi, REST APIs

## EDUCATION

**Shri Ramdeobaba College of Engineering and Management**

B.Tech in Electronics and Communication | Dec 2021 – May 2025

## CERTIFICATIONS & CURRENT LEARNING

- Databricks Fundamentals Accreditation — Databricks | September 2026
- AWS Cloud and Technical Fundamentals — edX | December 2024
- SQL Analytics on Databricks — Currently developing practical skills

## PROJECTS

**License Plate Recognition System** | 2024

- Built a Python-based computer vision system for real-time license plate detection and text extraction using OpenCV and EasyOCR.
- Achieved approximately 90% recognition accuracy with low-latency processing for smart traffic and automation use cases.
- Applied data preprocessing, image processing, and machine learning/computer-vision concepts to a real-world problem.

**Digital to Tactile Feedback (Braille Translation Device)** | 2025

- Developed a Python-based Braille translation system for converting digital/text input into tactile feedback for accessibility applications.
- Implemented voice-command functionality using Python-based speech-to-text and text-to-speech libraries.
- Worked with OCR and real-world input processing using EasyOCR and Raspberry Pi.
- Research based on the project was accepted and published in IJRASET.

**URL Shortener Service** | 2026

- Built a backend service to generate, manage, and redirect short URLs.
- Implemented authentication and basic analytics, including click-count tracking.
- Worked with MySQL, APIs, and backend data processing.

**Data Cleaning & Preprocessing using MySQL** | 2026

- Cleaned and preprocessed a real-world layoffs dataset in MySQL — handling missing/null values, duplicate records, inconsistent formatting, and text and date fields to improve overall data quality.
- Applied UPDATE, DELETE, ALTER TABLE, CASE statements, string and date functions, aggregate functions, CTEs, and window functions to transform and standardize the data.
- Structured the workflow from raw data through exploration, duplicate removal, and missing-value handling to a clean, analysis-ready dataset.

## PUBLICATION

AI-Powered Braille Learning and Assistance System for Visually Challenged Individuals

IJRASET | April 2025 | DOI: 10.22214/ijraset.2025.69998

## ACHIEVEMENTS & CONTRIBUTIONS

- Winner – Technoxian World Robotics Championship
- Mentor – Robotics and Aviation Club (1.5+ years), guiding junior teams in hardware and software integration.
- Open-source contributor with projects on GitHub.
